The Teller committee met this morning, pursuant to Saturday's adjourn-There were present the Chairman, and Senators Cameron, (Wis.), Kirkwood, Bailey and Garland. The Chairman having laid before the Committee the opinion of the Acting Attorney General, that the \$20,000 appropriation of last June is available and announced that Comptroller Porter will approve a requisition to place it to the credit of the contingent fund of the ate subject to the drafts of this tice, Senators Bailey and Garland raised the point that the commitshould decide for itself whether or not, it can legally use the money. They (Messrs. Garland and Bailey) agreed with the opinion expressed by the Comptroller, and although another officer of the Government had given a different construction to the satute, the committee which is to create the liabilities should be guided by its own conscientious judgment as to the propriety of sanctioning a construction hat a majority of its members might believe to be erroneous. Senator Kirkwood remarked that he

as never had any doubt that the Compdeller's opinion is wrong, but however this might be, he insisted that there was no necessity for the committee to go behind the admitted fact that the financial officer of the Senate now has the money.

pressed similar opinions, and the subject was dropped.

On motion of Mr. Cameron, a resolution was then adopted that a sub-committee of five be appointed to go to New Orleans, Charleston, and such may determine, to take testimony and report to the full committee. The chairman thereupon appointed the above named five members, who were present, to constitute this committee. In response to an inquiry of Mr. Bailey as to when the majority proposed that the sub-committee should start Mr. Teller said be would be ready to start in two hours, and Mr. Kirkwood remarked that he also would be then ready, provided he could pack his

shirts by that time. Messrs, Bailey and Garland said they had other committee work, etc., o hand which would occupy them during the recess, and there were also some matters to which they should give attention for a short time after the reassembling. They therefore suggested that the departure of the sub-committee be deferred until a few days after Con-

gress meets. Messrs. Teller and Cameron urged that the work of investigation should be promptly begun, in order to complete before the 4th of March.

The Democratic Senators rejoined that they also were desirous that the investigation should be prompt and thorough, and they wished to finish up their other official work here before their departure, because after that time they and the other members of the committee would doubtless be occupied all the rest of the session by this investigation in the Southern and Northern States, ranging from Louisiana, through Mississippi, South Carolina, Virginia, Pennsylvania, New York, and to Massachusetts, all of which had been men-

Mr. Teller to Mr. Bailey: "And perhaps also in Tennessee." Mr. Bailey: "Probably also in your State, Colorado."

Mr. Kirkwood inquired if anybody had yet suggested lowa as an additional field for investigation. A motion, submitted by Mr. Garland, that the sub-committee leave Washington on the 9th proximo, was defeated by a party vote of three against 2, and after some further colloquy it was finally agreed unanimously that it should start for New Orleans next hursday. It was also understood that the other sub-committees shall be ap-

pointed hereafter.
On motion of Mr. Garland, a resolution was adopted requesting the President and the Attorney General to furnish to the committee all information in their possession, relative to lence of the rights of citizens in the States named in the President's message and the Attorney General's annual report, so far as in their judgment may compatible with the public interests. The committee then adjourned, subject to the call of the chairman.

The Christmas Holidays--Bad Weather--The Newly Elected County Officials -- The Senatorial Contest--The News.

Correspondence of the News.

WARRENTON, Dec. 30, 1878. Your correspondent will write you a few items from his old homestead. The Christmas holidays passed off very quietly, there being very few drunks and downs. The usual parties and frolics came off, as usual, in which all seemed to enjoy themselves.

The weather for the past few days

has been exceedingly rough, the snow and sleet preventing man and beast from travel. However, at the date of writing the weather has somewhat mod fied, and travel is much better. On Dec. 20th, the newly elected county officials met 19 Warrenton to render their justified bonds for the performance of their several offices for the easting term: All gave bonds, which were accepted, by the new Board of County Commissioner. But when the bond of Register of Deeds was offered by our old friend, J. H. General Roberts' Koorum valley column is entrenched at Peiwar pass, and a reconnoisance of the Shaturgardin pass disclosed no enemy. He will remain where he is until spring, walls, round towers, narrow streets, and a population of about two thousand. It though forage is scarce, fuel is to be obtained in any quantity from the pine clad mountains that surround the plain. It offers a very convenient halting place and will be an eligible base whence to begin operations in the spring against Cabul, which is a little over one hundred miles distant.

The three armies, comprising an effective force fully fifty thousand strong are in strong positions. Christmas Disturbances at Hickory. Charlotte Observer.

ities, and that afternoon while the of-fenders were on trial a large crowd went to the mayor's office, which is very small, and announced their purpose to enter. The mayor ordered them to be locked up, and when the officers laid hold of the ring leader eight or ten of the negroes fell upon them. At this juncture the people of the town came running from all directions, and a general engagement followed, lasting five or ten minutes. Brick-bats, rocks, sticks, boards, &c., were used freely and several pistol shots were fired, but no one was seri-ously injured. The negro rioters were dispersed. Some were imprisoned and

others ran out of town. Chris mas day an unusually large crowd of people from the country came into the town, and by the middle of the afternoon some of them were very full and boisterous. The policemen endeavored to prevail upon them to be quiet, but finally had to start to the lock-up with one Perry Fry, late out of Yorkville, S. C., jail. Fry's friends, about one hundred in number, thereupon raided on the officer and releasedthe prisoner. This engagement likewise became general, and during its progress a young man of the town knocked down a countryman, Reuben Miller by name, inflicting a bad gash in his forehead.

The Inconvenience or Resump tion.

Springfield Republican. Although it may be wise to increase the store of bullion in the country by coining a token money of silver for small change, some industries and trades are very much embarrassed by the inconvenience of coin for remitting purposes. Half dollars and quarters, dimes and pennies may be secured in envelopes and trusted to the mails, but their presence is usually manifest to the outside observer and hence the risk of theft is greatly increased over what it is in'the transmission of paper scrip. A large toy business in this city finds it of no use to advertise its goods to be sent in the mails on receipt of the price because of the aversion to remitting in silver. Postage stamps are the only paper currency of remittance and the supply of these in trades doing a business of this kind becomes very embarrassing. We hear of one firm which and then but seventy miles will lie be- has on hand \$4,000 in postage stamps, acquired in the legitimate way of remittance, and not by illegitimate purchase to increase the commissions of country postmasters. Some of the western newspapers have asked for the reduction of the rate on postal orders, but as the postal-order system has only just reached a self-sustaining basis, this would not be wise, except upon remittances for a small amount. Ten cents is quite a tax on a remittance below \$1 or \$5, but cheap for sums above that figure. On the other hand, the new efforts of the express companies to do everybody's errand and collect on delivery obviates in some measure this

New Orleans Democrat. The Blaine committee has got the very man it needed for secretary-Mr. James Redpath. Redpath has more experience than Blaine himself as an outrage shricker, having gone into that ousiness long before the Senator from Maine appeared in public life. Redpath's first appearance before the pub-lic was prior to the war and during the troublous times just preceding the ent-rance of Kansas into the Union. He was one of the leaders of the antislavery party of Kansas, and was quite famous at that time for coining stories of outrages and forwarding them to Re. of outrages and forwarding them to Re, publican newspapers for publication-Having acquired a reputation in this "outrage" business, Redpath has always been employed as secretary of Republican committees visiting the South for the purpose of unearthing purposes. Thus, he went with the outrages. Thus, he went with the senatorial investigating committee to Mississippi in 1875 as secretary. The committee threw the whole responsibility on Redpath, who wrote up their report, working into it many coinages

of his own brain. Last year, when another investigating committee was sent to South Carolina by the Senate, Redpath was again selected as secre-tary and framed the blood-curdling report lately presented by this committee. If there is one good outrage writer in the Union, Redpath is the man.

The Finauces of the World. A well known financial writer has ust published in the Financial Chroncle, of New York, a letter on the coudition of financial affairs in England and Europe generally. He reaches the following conclusion: That actual, real money only includes metallic money that silver has been demonetized in Europe, and ranks now as a representative of money; that from 1848 to 1873 the real money of the world was increased 40 per cent. or from \$5,000,000,000,000 to \$7,000,000,000, creating the unexampled period of growth of the world's productions and trade; that since 1873, by the demonetization of silver and the contraction of the real money of the world, money is proportionately scarce. As money has become dealer as it has been decreased in volame, it follows that the value of all ammodities and property has decreased. The business of the world has been contracted and crippled just as it was stimulated by the increase of money between 1848 and 1873. He concludes that as the contraction of trade, of production, of prices and of prosperity, is hurricane roof like a wet rope, while due to the contraction in the world's money, so the natural, direct remedy is the restoration of the supply of money ed urchin, with an old boot in his hand, by the remonetization of sover generaily, in Europe. l'ause and Reflect.

The year is almost gone, and in all its months you may not have done a single good deed. A chance is offered you to do one thing, at least, and that is to furnish yourself with a suit of clothing which will make you appear tasty, and let you begin the new year in style. By calling on Loader, the tailor, at his rooms over Tucker's store you may accomplish this desirable end, at small cost to yourself and be sure of

Stonewall Jackson's Death

Wound.

Char eston News. Gen. Jubal A. Eurly contributes to to the December number of the Southern Historical Society papers an elab-orate article on the wounding of Stone-wall Jackson, which will be read with painful interest by every ex-Confederate. It includes a long and plainly written narative by Capt. R E Wilbourn, of Mississippi, who was the only officer actually with Gen Jackson at the time he was wounded. In the words of Gen. Early: "His account of of the whole affair shows how very erroneous are the generally received accounts; and now it appears that instead of riding to the front to reconnoitre the enemy and then imprudent-ly salioping back toward his own line, Gen Jackson was slowly riding to the front, waile making every effort to aurry forward the troops, when he was need on by a portion of his own men on the right (south) of the road, and obliquely from the rear, and that then the horses of his party that were not shot down wheeled to the left and he galloped into the woods on the leit to escape the fire, when he was fired upon by another body of troops on the north sae of the road." It was by this by this last fire that Gen Jackson was wounded. One bail struck him in the left arm two inches above tue shoulder joint, shattering the bone and severing the chief artery; a sec-ond passed through the same artery; a third passed through the same arm, between the elbow and wrist, making its exit through the palm of his hand, and a third ball entered the palm of his right hand, about the middle, and passing through broke two of the bones. All the circumstances surrounding the wounding, as well as those immediately preceeding and succeding, are told with graphic distinctness and picturesque detail and Gen. Early's article although apparently intended only as a reply to some erroneous statements of Gen. Re-

New York Tribune.

A dangerous method of using morphine to produce pleasurable sensations is believed by physicians in this city to be a growing vice. Morphine is one of the principal constituents of opium, and has the effect of relieving pain and preventing sleeplessness. It has been found, however, that frequent interval doses of the drug had an injurious effect on the intestinal canal and gradually undermined the system. Of late years physicians have nearly abandoned the practice of administering morphine by internal doses, and have adopted, instead, the use of a needle-pointed syringe, by which small doses of the drug are injected under the skin. The effect of the drug administered in this way is much quicker, and smaller doses are required. The use of the morphia syringe was confined to medical experts for a time, as it was believed to be attended with unusual dangers in unskill-ful nands It has become a practice with some physicians, however, to teach their patients how to administer morphia injections, and it is not surprising that many persons who have experienced the delightful effects of the drug in time of sickness, should use the instrument to banish imaginary sufferings. Several prominent physicians of this city were visited by a Tribune reporter recently, and their statements showed that the vicious babit is spreading to an alarming extent.

A strong opposition to the frequent use of the morphia syringe was ex-pressed by Dr. Jared Linely. "It is an instrument of death," he said, "in the hands of any person except a skillful and cautious physician. If the use of the instrument is ever justified, it is in cases where immediate relief must be given to excruciating pain. Whenever morphine can be given in internal doses, I believe it should be administered in that way. A dose of the drug injected under the skin is taken up by the bloed, carried to the heart and disseminated through the system with great rapidity. The effect on the vital organs is all the more hurtful because of its suddenness, and because the impurities of the drug are conveyed directly into the blood. It is not surprising that many deaths have resulted alrectly from the mode of administering anasthetics. It is a crime for a physician to teach the use of such an instrument to his patients. The practice is sending hundreds of persons to the inebriate asylums and filling

thousands of homes with misery." Mineral Waters.

No-Fence Law. When a community of people have from time immemorial, been accustomed to a certain habit of thought or manner of living, it is exceedingly difficult to break up those habits and change those ways. It is also true with the people of this State, that they seem slow to change old systems and adopt new ones. We are led to these reflections by considering the fact, that notwithstanding the no fence law has been tried upon a large scale in other States and to a limited extent, even in our own State, and always with the most | Sanford's Serie; Analytical satisfactory results, yet with the one exception of the experiment referre to, North Carolina is covered up with rail fences. Now, as a public journalist, we have only the good of the people at heart, and we do not mean to write in a spirit of dictation or fault-finding, but we do think that with the possible exception of a few mountain counties the

throughout the State. In days gone by, when timber was abundant and labor cheap, the matter was one of very little importance, but it is not so now. There are several reasons which in our opinion make it very desirable to adopt the no-fence system.

no-fence-law should be adopted

First, the supply of timber is getting small, and it is very important that our timber should be preserved. There are so many things of utmost value which depend upon a proper amount of forest land that the subject assumes a position of the highest importance. In order to keep up the vast quantity of fencing necessary under the present system, an immense quantity of timber is consumed annually, which should be saved.

In addition to the consumption of timber is the enormous expense necess sarily incurred. Labor is now too expensive to be throwing it away upon something which could be easily dispepsed with. Fencing is now one of the most important items in the outlay of the farmer, an I when lands are rented or worked on shares, it is almost impossible to keep the fences in a condition sufficient to keep off stock.

Another objection to the present system is, that in hundreds and thousands of cases it works injustice and hardship. Under the present law, the land owner must have a fence of specific hight, around his cultivated land, and be subject to indictment if he fails. He is not required to have this fence to keep his neighbor's stock off. He is at liberty to turn his own stock out and let it go wherever it can, and his neighbor has the same right, and each is working all the year to keep the other's stock off. This whole thing looks ridiculous to us. But there is another consideration more pointed. The man who owns no stock and against whom, consequently, his neighbor does not have to fence, is compelled to use the very same precaution he would, if he had stock. We have a case in mind where a gentleman living in town owns a farm in the country, on which what stock he has is kept up all the time and never allowed to run at large, and yet he is compelled to keep up about six miles of fencing to protect his crops from the stock of his neighbors. This does not look to us, to be precisely right or just. We are decidedly of the opinion that it would be far better for each man to fence in his own stock than to fence off the stock of his neighbor. It would take much less fencing and consequently save a very large amount in labor and timber.

Besides we think if a man own one acre or one thousand acres of land, he should be protected in the quiet and undisturbed occupancy and use of the same, and not be required to build a five foot fence all around it, before be can enjoy any benefit from its owner-

Let the man who keeps stock, keep it on his own premises, and if there are | CHRISTMAS GOODS. any who from necessity or choice do not keep any, do not compel them to incur an enormous expense simply to protect the selves from their neighbors. We give our views, and we invite a discussion of the question. What do the farmers say about it? This matter will doubtless occupy the attention of the legislature when it meets, and the matter ought to be well examined. that their action may be wise.

The experiment in Mecklenburg county has proved entirely satisfactory, and we have no doubt, if the people would adopt the system, it would be impossible to induce them to abandon

1s It Legal? An extra regular term of the Superior Court is to be held in Wake, beginning next Monday, January 6. There are grave doubts whether this term has not been abolished. An exactly similar term was to have been heid in New Hanover, but the County Commissioners being advised by counsel that the term was abolished by late legislation have requested Judge McKoy not to hold it. As one of the features of the ensuing term of Wake Court is the trial of George W. Swepson, which is set for January 8, the News would suggest that all danger of illegality can be cured by an application to Gov. Vance and his ordering the Court as a Special

Where is the Benefit? The Convention of 1875 abolished biennial sessions of the Legislature, thereby serving every other year about \$90,000 (including extra printing, etc.) As a consequence there was no legislative session last winter. But the rate of taxation has been the same for 1877 and 1878 as for 1875 and 1876. Now who has been benefitted by this \$90,-

000? Evidently not the taxpayers. It was certainly honestly expended, and therefore the fault was in the legislative acts permitting a continuance of high salaries and government extrava-

FOR THE CURE OF

Hepatitis, or Liver Complaint, DYSPEPSIA AND SICK READACHS.

Symptoms of a Diseased Liver.

DAIN in the right side, under the

edge of the ribs, increases on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternative with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss o memory, accompanied with a painful sensation of having left undone something which ought to have been done, A slight, dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled, his feet are cold or burning, and be complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy. Several of the above symptoms attend the disease, but cases have occurred where few of them existed, yet examination of the body, after death, has shown the LIVER to have been extensively deranged.

AGUE AND FEVER.

DR. C. McLane's Liver Pills, in CASES OF AGUE AND FEVER, when taken with Quinine, are productive of the most happy results. No better cathartic can be used, preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a FAIR TRIAL. For all bilious derangements, and as a simple purgative, they are un-

FACTS ARE STUBBORN THING

[[(Registered.) A BRIEF HISTORY: The following is from the Raleigh News, and was a voluntary insertion and not an advertisement:

and was a voluntary insertion and not an advertisement:

"Years ago an old Indian left a receipt for curing Scrotula with Mrs Person's father. Mrs. Person lives in Franklinton, or in that section. A child was born to Mrs. Person, and it had the Scrotula. The doctors gave it up to die. She thought of that receipt, that was now old and musty, and hid away in an apstairs drawer. She concluded if the child was bound to die, it wouldn't hurt to follow that receipt. She went out and gathered the herb, got the whiskey, and did as directed to the child. Her child now lives well and hearty. More than this: Only a few months since a South Carolinian, whose name has slipped us, was suffering with some soroutious affection on the heel, he had been to the Hot Springs! Arkansas, and from there he went to Kittrell Springs. Notbing dia him any good. At Kittell's they told him of Mrs. Person's recipe, and Dr.— wrote to Mrs. Person's recipe, and Dr.— wrote to Mrs. Person's fishe cured that South Carolinian her receipt was worth money. And the south Carolinian sent her word if she cured him he would give her five hundred dollars. She sent him directions what to do, and added if they cured him he could send her twenty-five dollars; she wouldn't ask five hundred. The South Carolinian went home, and shortly afterward sent Ars. Person a check for twenty-five dollars, and wrote the most grateful letter he knew how. Biess these old indians. We would like to nave one for a hear neighbor."

"It will Care if Fairly Tested." It gives me much pleasure to be able to state that I nave derived an effectual cure of scrofula from the use of Mrs. Joe Person's remedy for that disease. I had suffered from Scrofula for more than three years, and had despaired of eve getting weil. I was treated during that time by three very emine. I physiciaus, without any good result. I then went to the national Surgical institute, at Adanta, Ga., and was treated there more than two months, with no better result than my family physicians metwith. After returned from the institute I was persuaded to try Mrs. Person's remedy, and I had not used it more than a week before I discovered its curative and healing properties, My sores soon began to heal, and the color of my skin changed as fast as the sores healed. I had not thought of ever getting well again, but my hopes increased, my low sp. ritedness fied before the remedy, and I am now enloying splendid health and am in good spirits. The remedy is milid as a purgative, and a strong tonic; it will heal the most stubborn sore in three weeks if taken regularly. It is my opinion that it should be taken some time after the sore is haled, to remove the cause of its effects, It should be taken regularly by all meaus, for I have sometimes neglected it, from the pressure of ousiness, and in all cases found that the cure already made would commence to retrograde, and for this alone it should be taken as the sylven regularity in the use of the emedy and it should be taken as the sylven regularity in the use of the emedy and it should be taken as the sylven regularity in the use of the emedy and it should be taken as the sylven regularity in the use of the emedy and it should be taken as the sylven regularity in the use of the surface of the respective of the surface of the surface of the respective of the surface of the surface of the surface of the respective of the surface of the respective of the surface of the surface of the respective.

A CASE OF CANCER. FAYETTEVILLE, N. C., Aug. 12, 18/8.

FAYETTEVILLE, N. C., Aug. 12, 18/8.

MRS. JOS PERSON:

Dear Madam—I have been using your Remedy for Scrotula over five months as an experiment for cancer. The cancer is of long standing, the doctors have been treating it, more or less, for twelve years, it has taken off my upper lip and a good part of my nose. When I began to use your Remedy it was growing rapidly worse, but the medicine seemed to check it very soon, and it has not made much progress since, except about two months ago, the medicine gave out, and I was without several days. It toon seemed to start anew, and grew worse very fast, until I had taken the medicine about a week, since then it has not changed much. I think if I could have nad the medicine soon enough, it would have cured me.

For more than a year before using your medicine, I was troubled very much with a action. It would miss every thrut beat for hours, then at other times it would increase in its action, and run up to 200 beats per minute. Since using your medicine I am almost entirely relieved of this, rarely feel it, and then not enough to speak of it. I would recommend any one sufering with heart disease to try your medicine. As a Tonic and alterative, I do not think it has any superior I have been using all the most powerful alteratives known to the medical profession for the last 12 years and 1 know of none superior to this. I think your medicine is destined to be a great blessing to the afflicted. Let every one that needs a Tonic or an Alterative give it a trial, and I do not think they will be disappointed.

Very truly and kespectfully,

An American Bull.

Almost everyone has heard of Irish "bulls," and have laughed heartily over Paddy's mistakes. Everybody has seen the name of the American "Buil" in type, as it is given to one of the best known remedies in the country, his "cough syrup." Who has not had the merits of the medicine put before his eve in a thousand shapes. The public, who well know the value of "Dr. Buli's Cough Syrup," will continue to use it knife blade. A Feline Policeman.

Many stories have been told of singue lar habits and practices of animais, but a cat in this city leads them all for singularity of tancy. This strange beast, which in size and appearance differs in no wise from the generality of its species, has beadquarters in the guard house, and is in fact a police pet. night at 1 o'clock, two policemen leave the guard house to make the rounds of the city. The cat leaves at the same time, and follows at their beels during the whole time of their absence, though it may last some hours, and will not leave them for an instant. Occasionally one policeman is followed, when the two take different directions. The cat has several times gone with them out of town, and never seems to grow weary of these night tramps, but is always ready when the hour comes, and no clock could better indicate the time than this watchful four-footed police-

Timely Suggestions.

The late fire but too clearly demonstrated the lack of facilities in the way of a water supply at such times of danger. The small cisterns on Fayetteville street which were used, were quickly emptied of the little water they held and the engines shifted from place to place, until finally, the steamer went to the capitol cisterns. As bas before been suggested, the need of a large cistern on Hargett street, at its intersection with either Fayettaville or Wilmington streets, is most apparent. To this a supply pipe can be led from the capitol cisterns, and thus it can easily be kept filled by the rainfall on the roof of so large a building. Then let another cistern be built on Wilmington street, where Martin crosses it, and yet another on Hillsboro avenue near the bridge over the railroad. The necessities of a better supply of water are too plain to be passed -The country wagon is become over with inattention, for the fact is that danger stares the city in the face at every fire. Why the policy of inaction is pursued no one can tell. Because the city has thus far suffered comparative immunity from fires, shall that be used as an idex of all future happenings? This is now the paramount need of Raleigh, and in view of the fact that the danger is one that at all times and seasons ever threatens, it is a subject which should receive the prompt attention of the Board of Altermen. It is stated, further, that there are but 950 feet of hose that can be used by the engines, all the rest having become worthless. Here, too, s another want, that should be looked after. There is too much valuable property here, and to) much carelessness, not to require the most thorough regard for all appliances for fighting

Her Strange Mistake, Junius Hall is one of the colored hash

adjusters of the Yarboro, and has given his heart's tenderest devotion to dusky damsel named Julia, who abides in the southern portion of the city. The course of true love was, however, interrupted by some matters which bred a coldness. But the merry Christmas came and Junius determined to win back his beloved. So after term takes place to-night, and we are nightfall he went down to her house and tapped gently at the door. She Lodge to be present at 7 o'clock this opened it slightly and looked out. She saw first his face and then was terrified at the steely glitter of something very like a knife in one of his hands. Frightened, she shut the door in his face, and safe within told him to begone, that she was sure he came to kill her, He sadly went away, wondering what could be the matter. Next day he found out, when he was waited ou by an officer, who desired him to appear at a Magistrate's office for trial. Thither he went, and tound Julia there, accompanied by a host of her friends. She gave testimony to the effect that Junius had come to her house as med with a knife and would have killed her had she not suddenly shut the door. The lover was horrified and too scared at first to speak. Soon he asked leave to explain, and said that he thought the surest way to make amends for past all feeling be-tween the girl and himself was to make her a present of some article as a token of amity and regard. So he had purchased a bracelet, which he had placed on his wrist. As he stood at the door the light fell on this and its glitter appeared to the timid girl to be that of a

Every Moment's Wonderful

Every moment that we live the work of destruction never ceases among what is scientifically called "the tis-ues" of which our bodies ares composed. Every moment, if we are in health, the work of repairing this destructive process soes on with equal pace. When the vial force is great, more vigor is given to the bio-d and murcular fibre than the ordinary vear and tear of existence uses up. When the vital force falls from any cause, there ensues a wasting away, which, if not arrested, ends in decay and death. Physicians all declare that when these symptoms of necline set in the only certain remidy is God Live O'l.
